DETAILED ACTION

Response to Amendment

1. In the amendment filed on July 24, 2006, Claims 1-6 have been cancelled, Claim 7 has been amended and Claim 8 has been added. The currently pending claims considered below are Claims 7 and 8.

Claim Rejections - 35 USC § 112

2. Claims 7 and 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. On line 9 of claim 8, the range limitation "from 63 g/L to 200 g/L" is not disclosed in the Applicant's specification. From the remarks filed on July 24, 2006 (page 4), the calculation shown by the Applicant is result in a possible lower limit of 63.68 g/L. Furthermore, the upper limit of 200 g/L has not been found in the specification. Claim 7 is dependent on claim 8 and inherits the same deficiency.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1751

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis, Jr. et al. (US 5,350,423).

Davis, Jr. et al. teaches a processing method for an indigo-dyed fabric (col 3, lines 47-50) comprising the steps of applying zinc nitrate or ammonium nitrate (col 4, lines 48-67) in the form of an aqueous solution (col 6, lines 13-17) and subjecting the resulting fabric to a heating process by drying in a tenter oven at 300° F (col 6, lines 17-19). The immersion step of Davis Jr. et al. is seen as a coating step for both sides of the cloth; therefore, it would have been obvious to a skilled artisan in the art of fabric treatment to optimize the quantities to arrive at the Applicant's amounts since Davis Jr. et al. disclose the same ingredients in similar concentrations absent of unexpected results. Regarding the thickener, Davis, Jr. et al. disclose the use of a starch in the process (col 6, see table in example 3). Davis, Jr. et al. do not explicitly disclose the concentration range of 63 g/L to 200 g/L; however, Davis Jr. et al. disclose a range of 0.5 % to 6.0 % (col 6, lines 49-54). A *prima facie* case of obviousness exists where the claimed ranges and prior art ranges do not overlap but are close enough that one skilled in the art would have expected them to have the same properties, see *Titanium MetalsCorp. of America v. Banner*, 778F.2d 775, 227 USPQ 773 (Fed. Cir. 1985). See MPEP 2144.05I. In this instant case, the recited 6.0 % of Davis Jr. et al. is close enough to the Applicant's limitation of 63 g/L.

Response to Arguments

4. Applicant's arguments with respect to claims 7 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1751

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
